Hemport Mercury.

SATURDAY MORNING, JANUARY 8, 1867.

With this number we commence another year-a year that brings us almost to the end of a century ince the issue of the first number of the Mercury We now lack only eighteen menths of that period and the short time that intervenes will soon pass by bringing us to a point never contemplated by those who issued the tiny sheet that then sufficed for Rhode Island, with the "freshest advices, foreign and domestic," under a quaint cut of Mercury directing the course of an outward bound man-of war, bearing the ensign of England, which also floated from the walls of the fort in the opposite side of the cut. The whole sheet, for years, never exceeded the dimensions of common fool's can, and frequently it was confined to half that size. But in its columns we often find paragraphs that are full of force and truth, while on the other hand they are quite amusing. Here is a picture of the French in 1759. We have endeavored to follow copy :-

"The French are a gay, warlike and turbulent People, seldem dejected by Adversity, and inteler-erable insolent in Prosperity. They exceed all Eu-ropeans in Courtesy and Compliments, and are remarkable for Cringes and Flattery.

A Frenchman is not tormented with Jeslousy, but

on the contrary, inclines to go with his Wife in all Companies, and is proud of seeing her admired, courted, loved. The French Language is a Mixture of Latin and German, and is spoken in most Courts of Kurepe."

Here is a paragraph on the political aspect of Europe at that day, which is not without interest at the present time :--

Russia and France are natural Enemies, but the Ensein and France are natural Enemies, but the Court of France has of late found Means to insimustic itself in Favour at Petersburgh through the credit of Justria and Sazony. Time will discover, whether France will not labour to bring about another Revolution in Favour of the Seedes and the deposed Emperor; for the Russian Auxiliaries that were lately sent into Germany, to not against the House of Bearbon, can never be forgiven. In order to prevent the Court of Faustia having Influence in the Affairs of Germany for the future, his most to prevent the Court of Russia having Influence in the Affairs of Germany for the future, his most Christian Majosty will find it necessary to encourage the discontented Lords, to gain those on the other Ride, and inv a strong Foundation for a Revolution and Civil War. The true Interest of Aussia is to Maritime powers, against the Secoles and Fords, her most dangerous Neighbours."

Under date of Boston, October 22d, 1789, we have the following, in italies:---

" Mons, Montealm, as the French prison was almost ture of success, telling his men Wolfe was due a young lifteer, and he would non chastes him. The French Regular Batterious are reduced 150 Mm such and most of the Instantant have left them. The walls of Quebec are 150 Net chick."

We also find the following in the same paper:

I am poramadad, there are more of your Road-ture of Opinion, their Quobec was a dear Prophase. By the proof Lous we have sustain'd, in home algoritos of the tilentral, to submit nort to .

Providence we nitrobate that pleasure Krent four Lives, and require you will favor them pan from Leville, and experie from Yours do.

· O WOLFE!

Too pregnant Virms, mounted to a Flame, Taught thee to strutch, and pant for early Fam Showld, Chaored live not, by Extent of Reseath,

Under the local head there appears the following. which, how ever it may amuse now, was invocated in

"We hear neveral versels have been cost away in the late Storm, at different Places. [We are supposed In. American should neglect interests this Storm, in his Almanack, which might have prevented the Paire that attended these unfortunate

The number of olgans stated in the Balanca to h 261,618,100, which are valued at one milition one handred and thirty thousand five hundred and sightractor dollars, eightractorant-half cents. (1,18),887,814).

have a presty insimate presonal knewledge of the eigen train, and substantially state my belief about the howest average value that can be put upon abovigate exposed from this city is fifteen dellars mand, whilst the price current for ISAs (a able authority) places the number of oigneexperied from this city alone, in that year, as a the (00,000) and I believe the same tale would believe the same tale would believe the same tale. the me to be the public into all the finite receives of the principal ingredient of which is the savory and that our citizens will be extraord by the market water of the principal ingredient. Of which is the savory and that our citizens will level their sid to being our timbe in cigano, but I positively affirm that not one-senth of the things recalled in the United States be a Coloatial.

Bavana rigure have been manufactured in this

that port and returned to the United States, without care baving left the vessel. The duties are paid in the United States and they are sold at a large advance, for the imported article. But, as San Watand said of the real pie, "what's the odds, when the weeky piconan bimed don't know the difference." ----

Tue Ruone Island Case.—The most introusing paragraph in Thursday's Journal was founded on an entire misapprobassion of the schapaphic disposits to which it referred. The Rhode Island case that san decided in the Supreme Court of the United States, was not the case of Massachusetts against Rhode Island involving the boundary line between the two States. This case has not been argued.—The case in question was that of Klimbeth Moore to. Ray Greene and others, and was brought to recover a large amount of lands alloyed to have wer a large amount of lands alloged to have the Orenit Court on the ground that the allegations were overthrown by the the strategod illustration.

This devision was affirmed by the Supreme Court. Providence Journa

We noticed the paragraph referred to, and, as in duty bound, also insert the correction.

It is stated that the Cummissioner of Patents is "NOW sending to the State Agricultural Societies a parent of Chinase Sugar Cane Sucd, rained underthe direct supervision of the Patent Office, sufficient we plant sixture acres, while a view of extending the We sail the atmotion of our agriculturists be the fact, and hope that at the next annual this of the Aquithuck Society, we shall be favored with miniples of the case grown on this island.

In turns out that there was no work in the report from Bordeaux that a boat containing the captain and others of the Lyonnals had been picked up; but a despated from Malifax states that the beig-Beauty, from Jamaica, bad picked up a whale beat, settem up, marked "Le Lyennais, Marre," containing among other things a handkeredist marked "F. this is, so doubt, the book which was store before the best that was first picked up parted ing room at the free of the stairs. company with the other boats and the raft, and therefore never contained any of the crew or pas-

The New Poutord Mercury speaks in the following berms of Khode Island boof catalo :--

Fat Oxes — A pair of imagnificent Fat Oxen, fat-and by Mone - Lawton of Khode lained, that weigh 5800 lbm, were much admired for their bandsome proportions and prospective value by many of our citizens on Saturday has. This week that will be killed and to naise by T. S. Viall at the Union Market 134 Unchang about in common with others, as hope to have the natisfaction of a rotating piece from these excellent agreement of Rhode Island still in the mining of society.

The Monany Admirate contains a letter from Res Chan, Ching in which it is stated that Prussian this is so seared in the neighborhood of the "green ten? districts, that the patients and hardly afferd to is on the remetions of touir versuciale. This to pinasant news for the lovers of green ton.

It is now confidently stated that the Wimmense blessing of the English family, will shortly be

IMPORTANT PROJECT.—Senator James, of Rhodelsland, introduced into the Senate, on Thursday, a pill to make a harbor in Block Island, Long Island mile and a half long and a mile wide, twenty-two feet deep and well sheltered. Great benefit would accrue therefore to Sound navigation. The cost is estimated at two hundred and fifty thousand dollars.

The sound well sheltered and fifty thousand dollars.

The sound we have the second two weeks within a fraction. The whole number of deaths during the year was one hundred and seventeen.

We have seen the above going the rottee of it, this city in the two or three weeks, but have taken no notice of it, age of nearly eighty-one years. The number over from the simple reason that we deem the thing wholly impractical not but what we believe that the canal might be cut, but that it would remain Elizabeth White, the canal might be cut, but that it would remain abigail Fairbank, open only so long as means were furnished to keep it free from obstructions.

Abigail Fairbank, Siephen T. Northam, Mary T. Brinley,

Our readers are well aware that every measure Wealthy Maxicalculated to benefit this State, be it ever so remote in its results, has received, as it claimed, our hearty David Melvill, support. The subject now brought up has been Merey Care, agitated before, and that, as well as the Navy Yard Lydia Allen, project for this bay (which we have most cordially Benjamin Chase, approved) is made to take a conspicuous place dur-ing a brief season, and then it is quietly laid on the John Burber, shelf for a time, or till the proper moment to trot it Sarah Fowler, out again is thought to have arrived. The Navy Mary Barber, Edward Willis, and that has done a world of service in the way of bringing men into notice; and for this reason, if Abner Davis, for ne other, we think the State is entitled to the Joseph Cook, reward for furnishing so excellent a subject of dis Deberah A in

But there is not quite so much betrom to the scheme now brought forward by Senator Jauss, who, Samuel T. Grinnell, 83 | Cornellus Taber, if we are not mistaken, adopted the old Navy Yard Joremiah Briggs, 70 project at the commencement of his term. Island Pond, on Block Island, is large enough for a fleet of Benjamin Northup, 70 | James Braman, vessels of any size, and there is water enough to Elizabeth Wales, 84 float the largest ship that would be likely to need the shelter contemplated; but it will be remem-bered that the proposed canal of a thousand yards become unfit for food. What would be the expense, the following votes were passed of keeping the canal open ?

of sufficient length, wenth serve in part to keep a that the same be sent to the Sonators and Representatives of this State, to be presented to Congress, canal open, by breaking the force of the sea which forthwith. throws up the sand and gravel. But if such a work could be made to stand (and who could calculate its cost ?) it would answer, in great part, the object to Convention of the old Soldiers and Salters of the be attained in making the canal, as it would afford.

When of 1819-18 to be held in Washington, January Sch. 1827 and to prompte the object of our * shelter, where ressels could ride out a storm in Memorial by the best means they can mafett.

But the whole thing scome so impracticable that xxxx, Cox and Howsann, and Adjutant Snaw. we give it the go-by without further comment, as we give it the go-by without further comment, as an old and woment subject, troited out for inspect. The following Engine Companies have made so gion, to be posted and neglect as a favorite hobby. Species of their officers for the year cusuing :-and then, as we have already remarked, tenderly to | Farrent, No 1 .- Foremen, Wm. C. Townsann be put back for future use.

SMITH'S (ASA) ILLUSTRATED ASTRON.

OMY. A new year, in appeal to the first of the float of Judges well according to the control of the float of the fl SMITH'S (ASA) ILLUSTRATED ASTRONOMY. A new work, in quarto form, containing
eighty pages, this ty two of which are BEXUTIFEL
DIAGRAMS, each illustrating some important principle in Astronomy,—and, altogether, giving
most of the representable phenomena in this inter
esting science.

The subject is treated in so definite and simple
a manner, that it can be comprehended by the
most common recoder, and any teacher can introduce this work into his school, without having
any previous knowledge on the acience.

interested in stram power, to carefully examithis invention, which entirely changes the put ciple and character of Hot Ain Furnaces developing another and a new principle, and obvioting all former of j ctions to their use. The practical operation of a number of these furnaces, erected during the past winter, points out a new discovery in science, by which the most wonderful geometry in (use has been attained, and cleardemonstrates that the waste heat lost from chimmeys is enough to warm every dwelling in the city. By this invention the formerly wested fuel is made to warm the House.

This discovery—simple in itself—is the daily wonder of those who witness its results, and it becomes a matter of surprise that a plan at once we significe and precision in its order and precision in the content of the surprise that a plan at once we significe and precision in the content of the cont

se sin ple and practical in its operation should thus far have entirely escaped the notice of scientific men. We believe no one who investigates this principle will be liable to use a Furace constructed on any other principle, and we eall at our store.
